DETAILED ACTION

1. Election/Restriction

- A. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 11 in part, 15-20 and 21 in part, drawn to a method for treating a patient having a liver disease by administering IFN-alpha 5, classified in class 514, subclass 2.
 - II. Claims 11 in part, 12 and 21 in part, drawn to a method for treating a patient having a chronic hepatitis C by administering IFN-alpha 5, classified in class 514, subclass 2.
 - III. Claims 11 in part, 13 and 21 in part, drawn to a method for treating a patient having cirrhosis of viral origin by administering IFN-alpha 5, classified in class 514, subclass 2.
 - IV. Claims 11 in part, 14 and 21 in part, drawn to a method for treating a patient having hepatocellular carcinoma by administering IFN-alpha 5, classified in class 514, subclass 2.
 - V. Claim 22, drawn to a method of screening liver cells of a patient for reduced IFN alpha 5, classified in class 435, subclass 7.2.

- B. The inventions are distinct, each from each other because of the following reasons:

Inventions I - V are independent and distinct, each from the other, because the methods are practiced with materially different process steps for materially different purposes and each method requires a non-coextensive search because of different starting materials, process steps and goals. A search for methods to treat hepatitis C would not necessarily overlap a search for methods to treat cirrhosis or hepatocellular carcinoma.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter as defined by MPEP § 808.02, the Examiner has *prima facie* shown a serious burden of search (see MPEP § 803). Therefore, an initial requirement of restriction for examination purposes as indicated is proper.

Art Unit: 1647

C. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR § 1.48(b) and by the fee required under 37 CFR § 1.17 (h).
